Tkachenko, A. V.
ON THE POWER OF CONVECTION AND ITS UTILI-
ZATION IN LOCAL FORECASTING, tr. by T. C.
Marwick. 22 June 59. 7p. (10 equations omitted)
Trans. no. 1; M1515
Order from LC or S.A. mi\$1.80, ph\$1.80 61-13562

Trans. of Glav[naval Geofizicheskaya Observatoriya]
Leningrad. Izv. (USSR) 1957, v. 69 [131] p. 36-40

The convective power is more completely character-
istic of convective motion than the energy of instability,
usually used by weather services in forecasting con-
vection. A method is worked out for determining the
power of convection from aerological observation
(temperature and winds), and the relationship is in-
vestigated between the convective power (determined
from data of morning sounding) and the maximum in-
tensity of convection in day time.

Klyuchnikova, L. A.
 ADVECTIVE FOGS PRODUCED BY COOLING OVER
 THE SURFACE OF THE SNOW COVER. 18 Nov 59.
 7p. (1 fig. 16 equations omitted) Trans. no. 29;
 M1931

Order from LC or SLA mi\$1.70, ph\$1.80 61-13315

Trans. of Glav[naya] Geof[izicheskaya] Obs[ervatoriya]
 Leningrad. Trudy (USSR) 1958, v. 77 [139] p. 3-6.

The conditions are considered under which the formation of advective fogs due to cooling over snow is possible. The omitted calculations show that for the formation of fog over snow a greater cooling of the air mass is necessary than over a surface without snow, with the same properties of the arriving air mass, i.e., the effect of the drying of the air by the snow is confirmed.
